

## Day 2 [31-10-2025]

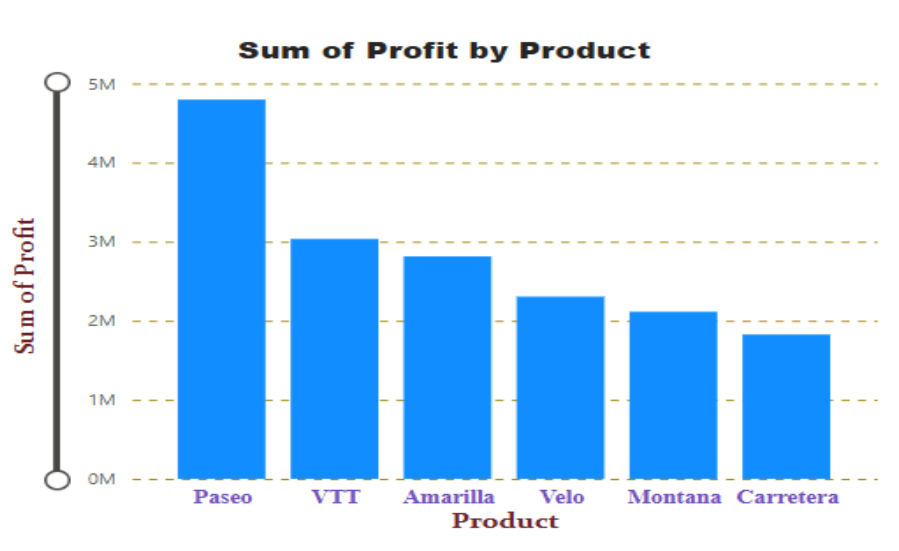

### CT – Stacked Bar Chart

**Insights :** The chart shows that **Paseo** is the **highest-selling** product, significantly outperforming all others with sales close to 30M. VTT, Velo and Amarilla contributing moderate sales to the overall revenue. Meanwhile, Montana, and Carretera have relatively lower sales figures, indicating they are less in demand compared to top-performing products.

### Steps to Reproduce:

1. Selected Stacked Bar chart from build visuals.
2. Pass Sales to X - axis and Product to Y - axis. ( Always pass Categorical data for 1<sup>st</sup> axis)
3. Go to 'Format Your Visual' and change the values in Y - axis.  
We can Change the font style, size, color by turn on the Title.
4. In 'Format Your Visual' options like Range, Value and Title for x- axis.
5. Go to Gridlines : Turn off Vertical radio button.
6. Go to Bars : In categories select product name for particular column for each bar.
7. Go to 'General' inside the Format your visuals turn on Title radio button to give **Head line** for a chart.
8. If want to add more tooltips to chart means Pass those values to Tooltip in 'Build visual'.

## CT – Stacked Column Chart

**Insights:** The analysis of profit by product shows that Paseo is the top-performing product, generating the highest profit among all categories, followed by VTT and Amarilla, which contribute moderately well to overall earnings. In contrast, products such as Velo, Montana, and Carretera show significantly lower profitability, indicating either lower demand or reduced pricing margins.

## Steps to Reproduce:

1. Selected Stacked column chart from build visuals.
2. Pass Product to X - axis and Profit to Y - axis. ( Always pass Categorical data for 1<sup>st</sup> axis)
3. Go to 'Format Your Visual' and change the values in X - axis.
